# Connected

At Cornthwaite Group we are focused on ensuring that you get the most from your investment, an important part of this is minimising your downtime should an issue arise. Technology plays a key role in enabling us to support you quickly, we do this by using a selection of connected support tools that are available throughout the John Deere and Kramer ranges. This is made possible through JDLink on John Deere machines and EquipCare on Kramer machines.

## JOHN DEERE PRODUCTS

Available on all 6M, 6R, 7R, 8R, 9R Tractors, SPFH, Combines and Self-Propelled Sprayers.

### Remote Display Access

Remote Display Access allows us to view your machine display remotely in real time, this enables us to advise you and your operators on how to optimise your machine and achieve optimal results.

### Service Advisor Remote

Through the use of Service Advisor Remote the Service department can retrieve any diagnostic trouble codes to help diagnose a potential fault. This allows us to carry out diagnostic work remotely and prepare parts before leaving the depot. This will minimise downtime by having some initial fault information before visiting the machine.

### Expert Alerts

Expert Alerts is a failure prevention feature and works by using algorithms created by John Deere. When an Expert Alert is activated it allows early intervention from our Service department and prevents a failure from occurring.

### Maintenance Alerts

Maintenance alerts allow our Service Department to proactively ensure that your equipment's maintenance schedules are up to date. Your tractor will inform us when routine maintenance is required, such as a service. When notified that a service is due, we will contact you to arrange this.

## KRAMER PRODUCTS

### EquipCare

Kramer Equipcare is a telematics system which allows our service department to view machine information and retrieve any diagnostic trouble codes. Like the John Deere system, we can carry out remote diagnostics on your machine before leaving the depot. This will reduce your downtime and get your telehandler or wheeled loader operational again quickly.

## Meet the Team

I would like to introduce myself, I have been welcomed into the service team by everyone here at Nantwich and within the Cornthwaite group. My background and experience predominantly has been in the construction equipment industry, but with having a keen interest in agricultural machinery from a very young age, I am looking forward to the opportunities that working with a leading brand can bring. I have 15 years' experience in service, starting out as an apprentice with Finning and in later years becoming a Service Manager. Technology is also an interest of mine and would like to work to promote the extensive use of JD link to improve our communication throughout the service department in order to help maintain the customers experience. I look forward to meeting customers and building relationships for the future.

**Rob Davis-Hilliard**

# LOLER

## RED: STOP! THINK!

If your business or organisation undertakes lifting operations or is involved in providing lifting equipment for others to use, you must manage and control the risks to avoid any injury or damage.

## AMBER: CHECK WHICH MACHINES YOUR STAFF ARE USING

LOLER defines a lifting operation as '... an operation concerned with the lifting or lowering of a load'. A 'load' is the item or items being lifted, which includes a person or people.

## GREEN FOR GO!

We can carry out LOLER & POWER INSPECTIONS on all of your John Deere and Kramer engine driven machines. And get you on your way safely!

Check out our  
**LOLER traffic  
light system**

LOLER testing  
starting from  
**£120**

**Customer Testimonial** "As a busy working farm we understand the need for safe working practice and reduction of risk through proper assessment, planning and execution. We are more than happy to partner with Cornthwaite and their professional team of inspectors whenever our LOLER testing is due. As a independent body, Cornthwaite supply thorough and professional engineers. Cornthwaite accords comfort and assurance and our Partnership has no hesitation in recommending their services" *Rachel Willis - J.H.Willis & Son*

# Winter Service Gator

## High Quality Light Bars

Our range of light bars have high lumen ratings across the entire range providing strong flood and directional lighting, slim-line design and vibration resistant, longer lasting with less draining on your battery than standard halogen lights.

# Extended Warranty

Protect your investment with one of our extended warranty packages. We understand the need for you to manage costs and taking out extended warranty helps you to budget for these costs.

## PowerGard Protection

PowerGard Protection is a contract to cover the cost of repairs after the regular warranty on your John Deere machine, for protection plus, it must be bought with a PowerGard Maintenance plan and needs to be taken out any time prior to delivery or within 28 days after delivery.

There are two levels:

### **PowerGard Protection covers:**

- Engine • Transmission • Frame

### **PowerGard Protection Plus covers the following additional components:**

- Engine auxiliaries
- Electrical components
- Steering and brakes
- Hydraulics
- Operator's station

# Extended Warranty

## Greenshield Protection

We can offer GreenShield Protection for your John Deere used machinery. This plan allows you to manage your exposure to risk by providing coverage against failure and protect the machine's major components, therefore limiting downtime and cost. We offer a Greenshield product that will cater for most of your tractors and machinery within 2 years and 2000 hours.

Warranty coverage is however available for tractors and machines up to 7 year old on existing or newly acquired John Deere Tractors, Combines, Gators, SPFH, Balers and Trailed Sprayers. GreenShield Power covers: Engine unit, Emission controlled exhaust system including sensors, Fuel system, Transmission system, Driveline system & Hydrostatic transmission control system. GreenShield Plus covers the following additional components: Hydraulic systems & Electronic components.

Protect your investment with one of our extended warranty packages. We understand the need for you to manage costs and taking out extended warranty helps you to budget for these costs.

Example: To put 1000hrs/12 month warranty on a used 865M gator inc servicing

£1.45p/hr

**KRAMER**  
*on the safe side*

Kramer customers can also take advantage of packages we offer for warranty extension which can cover your Kramer product for up to 60 months and 6000 hours, these are available on wheel loaders, telescopic wheel loaders, telehandlers with the warranty extendable to 24,36,48,60 months our customers can increase their worry free period.

Please contact your service office who can offer you various plans to suit your requirements.

Example: KT357 24month/2000hr Service Plan & Powerline 24 extended warranty

£2.96p/hr

# Maintenance Plans

At Cornthwaite Group we can offer a variety of maintenance plans for your JD and farming equipment

## John Deere Maintenance Plan

Efficiency and predictable costs are key to running a successful farming business. John Deere maintenance plans are a straight forward solution to all of your JD equipment servicing requirements, designed to help you budget your total cost of ownership. It is a tailored solution to keep your machine running at peak performance and control your operating cost. Within moments we can work out a bespoke maintenance plan for all of your new and used JD equipment. Simply entering the specification of your equipment, anticipated annual hours and the length of term required to service.

**Our service teams look forward to offering you a free no obligation quote**

## Kramer Maintenance Plans

Like for all of your John Deere servicing needs we have designed our own maintenance plan for all your Kramer agricultural and industrial servicing needs. Again by taking the machine specification, maintenance plan start date & hours, expected annual use and last service, our team can very swiftly offer you a price for all your machines servicing. In taking out a maintenance plan with us not only are you budgeting for costs and keeping your machine in the best possible condition, but you will be future proofing any possible parts and labour increase as well as taking advantage of the best parts and service discounts that are applied to all our maintenance plans.

# Maintenance Plans

Our service departments look forward to you contacting them to discuss all of our servicing packages or alternatively email **[offers@cornthwaitegroup.com](mailto:offers@cornthwaitegroup.com)** and we will be glad to contact you.
