JOHN DEERE

WELCOME

Here at Cornthwaite Group our Groundcare team are focused on the sale and support of products for the residential sector and private landowners. We recognise that applying our same core values enables us to offer a very personal and highly professional service to our customers. As well as private clients, our customers include Councils, Airports and Caravan Parks.

We have a wide range of new machinery. From the extensive John Deere Lawncare range to Gators and Compact Utility Tractors, all the way to Stihl handheld products – we can cater for all your needs.

We also stock used machinery and when purchasing used Groundcare equipment, it is essential that it can be bought with confidence. We recognise this and always

ensure our used inventory is prepared to the highest standard.

Our Aftersales department, made up of parts and service personnel, are all focused and have the passion and desire to exceed your expectations in giving first-class customer support.

Our factory-trained Aftersales staff, plenty of whom benefit from many years of experience, have a wealth of industry knowledge coupled with an ethos of welcoming new technologies.

As well as picking up one of our customer care brochures, we also invite our customers to visit one of our custom built depots or our website www.cornthwaitegroup.com for more information on our products and services.

GROUND CARE SPECIALIST

"I would like to introduce myself, I'm Paul Young and I started with Cornthwaite Group in July 2019. Having lived in Cheshire all my life, I am based out of

the Nantwich depot but also cover the other depots as appropriate.

I started working for a local agricultural dealership in 1989 with their parts and showroom team and moved over to their Groundcare sales so have a strong knowledge of Groundcare machinery including: Case IH, McCormick, MF, Iseki and in small machinery: Atco, Hayter, Stihl and many more. For the last 5 years, I have worked at John Deere dealerships and have sold many forms including: Walk Behind, Ride On, Gators, Compacts, Out Front, etc.

I think you need to have a different approach when selling the Groundcare side of the business, as the customer's garden is their pride and joy and sports pitches, golf courses, and other businesses are their livelihood. Therefore selecting the correct machine is vital. I am capable of advising you of any of your requirements.

At Cornthwaite Group, we pride ourselves on the approach when selling and aftersales support that the customer's small machinery is just as important as our customers with the big tractors.

Please do not hesitate to contact me to discuss our full range of products from a variety of manufacturers."

WHAT IS A TURBO-STAR FAN ASSIST? Whatever the weather, the proven TurboStar System ensures a precision cut and great collection every time. Even in damp conditions, the air flow generated by the blade draws the grass up straight before cutting; it also removes leaves from your lawn. After cutting, the air vacuum blows the clippings into the collection bag smoothly and efficiently.

WALK BEHIND MOWERS

RUN SERIES PETROL MOWERS

Easy mowing – Our RUN Series models are perfect for people who just want a mower they can rely on!

All machines featured below are self propelled & include:

ELECTRIC MOWERS

If you enjoy the simple life, a John Deere plug-and-go electric lawn mower is for you. The easy operation, robust mower deck and TurboStar mowing system ensure a great-looking finish with minimum effort. No need to worry about refilling with fuel, an electric powered lawnmower means you can simply plug in the cable and begin.

BATTERY MOWERS

If you enjoy the simple life, these Battery Walk Behind Mowers are for you. Easy to operate with the minimum of effort, whilst producing a great finish every time. John Deere Battery Mowers are easy on the environment. There are no fumes or local emissions and most of the mower materials can be recycled later on.

No Job is Too Large

For ultimate performance and power choose the X500 Series. With its low centre of gravity, long wheelbase and differential lock it is the perfect all-rounder

Mow slopes with more confidence, get out of tough situations and make garden tasks easier.

The X590 & X584 Multi-Terrain Tractors travel where you need to go and do the heavy-duty work you need them to. How? Their wide stance enhances stability on hillsides. Traction can be increased simply by pressing a pedal. The heavy duty frame combined with the high capacity engine and on board deck levelling assure the best performance and results every time.

SALES

Tractor
from
£15,122

The **X950R** mowing tractor thrives on hard work. This Rear Discharge Rear Collect model has a rugged steel frame and mower deck for years of trouble-free service. The high-torque diesel engine and heavy duty wheel motors can power across tough terrain all day and thanks to great ergonomics and intuitive controls, so can operators!

Choices of decks available are (prices on application):

48" (122-cm) and 54" (137-cm) High-Capacity Commercial Rear Discharge Deck.

Benefits include:

- The deep-deck design allows cleaner cuts and handling of larger volumes of grass.
- The deck is stamped from heavy 7-gauge steel (3.5 mm) for durability.

- A clean-deck design avoids material build up, makes cleaning easy, and smoothly guides the grass into the discharge chute.
- The edges are rolled 180 degrees for extra stiffness against impacts from obstacles; mower blade overlap is 3.9 in. (100 mm) for a reduced chance of striping between blades.
- The cutting height is conveniently adjusted with a dial knob on the platform. Engaging the deck is done by pulling the electric switch on the dashboard powering an electric clutch.

X950R

- Engine Power: 25.2 hp / 18.5 kw
- Transmission: Hydraulic
- Steering: 2 front wheel power steering
- Forward Speed: 14.5km/h
- Hydraulic deck lift
- Choice of collectors: Hyd high or low tip

SALES

ROLL-OVER PROTECTION

All X940 Series models are fitted with a rugged roll-over protection system (ROPS) to keep operators safe during operation. The bar can be folded down temporarily when working under trees or overgrowth.

DRIVE OVER DECK

You don't need tools or muscles to connect or disconnect these mower decks. Just

reverse over them slowly until you hear the click. These commercial grade decks are stamped from a single steel plate, then rust-proofed in a special dual process. The shaft drive is built to last, and the wet PTO clutch is virtually maintenance-free.

The new rear discharge deck is ideal for up-close trimming on both sides, and converts from mulching to rear discharge in under 30 seconds. The side discharge deck* is perfect in long grass.

Greater blade overlap reduces the chance of any missed grass stems, even on turns.

Optional Mulch Control provides the ability to change between mulching and side discharge.

Flat-top design provides a smooth underside for excellent cut quality, in addition to being durable and versatile.

Rolled outer edge adds strength to the deck and protects trees and fences while mowing. Wide roller and adjustable gauge wheels limit turf scalping on rough or uneven terrain. Deep deck design ensures great grass lift for an even cut.

Choices of decks available are (prices on application) WITH SIDE DISCHARGE are:
48" (122-cm) and 54" (137-cm) 60" (152-cm)
Cutting Height 25 – 133 mm, increments 6mm

TANGO

The John Deere TANGO E5 Series II maintains your lawn automatically to make your life easier and more enjoyable. The controls and technology are so intuitive, you'll be ready to mow in no time. Or rather, to watch while TANGO does it for you!

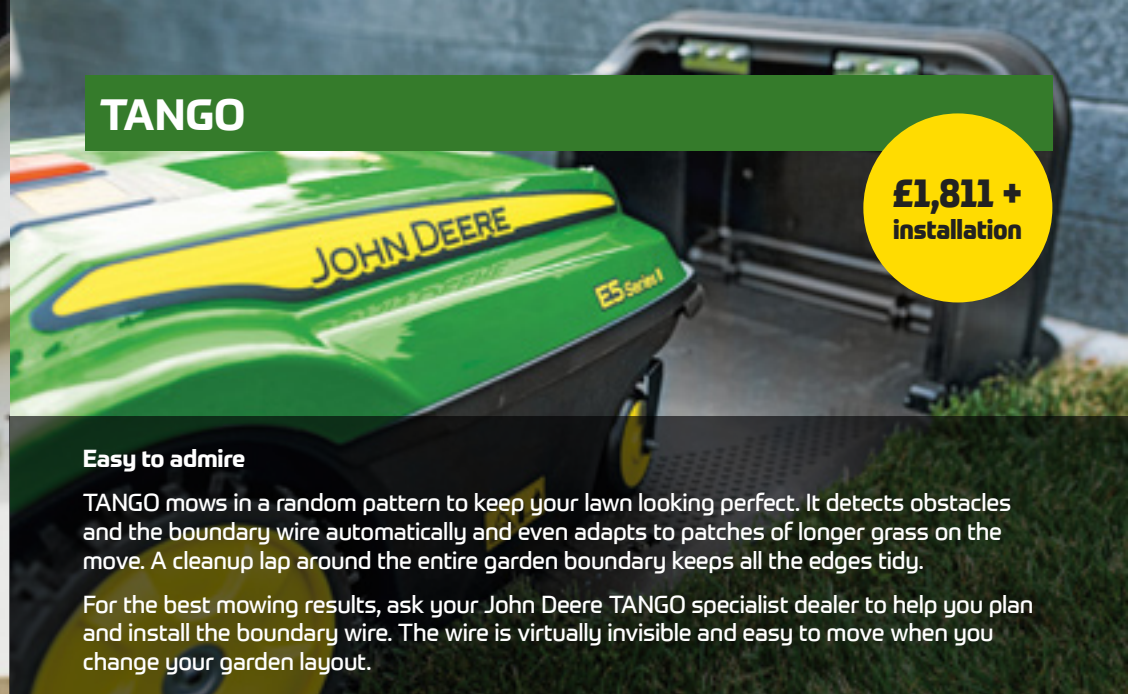

Rain or shine

TANGO is weatherproof, so it's happy to work while you stay snug and dry indoors. The double casing protects the most important components – electronics, battery and motor – for long years of reliable service.

Basic Specifications:

- Recommended mowing area: 2,200 m²
- Cutting height: 19–102 mm
- Li-Ion battery with 90 mins mowing time on one battery load
- Automatic charging
- Up to 36% hill climb capability*

TANGO

**£1,811 +
installation**

Easy to admire

TANGO mows in a random pattern to keep your lawn looking perfect. It detects obstacles and the boundary wire automatically and even adapts to patches of longer grass on the move. A cleanup lap around the entire garden boundary keeps all the edges tidy.

For the best mowing results, ask your John Deere TANGO specialist dealer to help you plan and install the boundary wire. The wire is virtually invisible and easy to move when you change your garden layout.

Masters Hills

The TANGO E5 Series II is smarter than ever. The mower drives forward until it reaches your boundary wire, at which point it curves and changes course – even on hilly terrain.

Easy To Operate

TANGO E5 Series II is smarter than ever. The mower's new driving performance takes it in a forward motion until it reaches the boundary wire, at which point it curves and changes course – even on hilly terrain.

Quiet

TANGO is so quiet, it can even mow at night without disturbing anyone. All with a minimum of fuss and noise – and no local emissions at all.

Safe And Secure

To stop the blade, just press the red button. The sensor in the handle locks the blade during transport. TANGO is PIN protected and the screen locks automatically – perfect when children are around.

Fixed Cost Servicing inc. Blade Replacement & Software Update

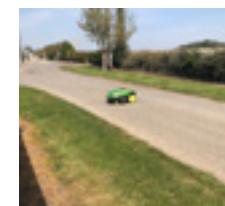

£129.00

Customer Testimonial

"My John Deere Tango is marvellous; I can make the most of my time off, while it cuts the lawn for me. The Tango has no problem tackling the slopes in my garden and even crosses the lane to cut the other side too. I would highly recommend the John Deere Tango to anyone who wants a machine that they can just set up and leave to do the job, without any worries. It really is that easy and simple to use"

David Hall, Pickering

GRILLO

Cornthwaite Groundcare range expands with the addition of Grillo products

Cornthwaite Group is pleased to announce we have recently completed an agreement to provide sales, services and parts support of Grillo products for North West England and South West Scotland.

This agreement means we are now able to supply a range of commercial, professional and domestic groundcare products to new and existing customers, that complement the John Deere product range available.

"Our Cornthwaite Groundcare division and the customers we serve are a key part of our business, being appointed a sales and support agent for Grillo is a great opportunity to expand the portfolio we are able to provide. Grillo is a well-established brand in this market with a reputation for quality products that embrace the latest technologies. We are looking forward to working with Grillo."

Adrian Street, Group Sales Manager.

Company History - Grillo

Grillo S.p.A. has been designing and producing professional and domestic machines for ground maintenance for over 60 years.

Thanks to its highly trained and qualified staff, Grillo makes the operators' job more comfortable by constantly seeking new technical solutions.

Every machine undergoes very demanding quality tests to assess its reliability, in compliance with current European standards, ensuring you spend more time concentrating on the job in hand.

With more than 20,000 machines sold in 55 countries across the world, you can rest assured you will be purchasing a trusted, tested product perfect for your application.

For more information please do not hesitate to get in touch with us today...

GRILLO

Grillo FD450

A professional hydrostatic mower with front-mounted 115cm cutter deck with a grass-catcher capacity of 450 Lt.

The grass-catcher discharge height is 170 cm with an ejection of 45 cm; the cutting and high performance collection of this model are its best features.

The easy light steering and exceptionally small turning circle make the Grillo FD450 a mower suitable for domestic use but at the same time equipped with all the necessary features for the professional operator.

The innovative cutting system "Grillo Overblow" allows tremendous acceleration of the grass/air flow into the discharge chute considerably increasing its collection capability, even in damp, wet conditions whilst at the same time keeping its noise level of the whole cutting/collecting system extremely low.

The front-mounted cutter deck gives the operator excellent visibility of his working area.

**FD450
FROM
£10,199**

Climber 10 AWD 27

Grillo Climber 10 AWD 27 is a truly unique hydrostatic brush-cutter. The permanent 4WD system combined with the 27 HP powerful engine (22 HP net power) offer brilliant performances on severe slopes and low-adherence grounds.

Remarkably efficient on high grass and up to 2,5 cm diameter shrubs, this machine is ideal for both agricultural and professional use.

Its compact dimension has been designed to boost its performance on slopes and the Kanzaki hydrostatic transmission with differential lock on the rear wheels allow the operator to work with maximum safety, reliability and unmatched stability under any working condition.

The Climber 10 AWD 27 is the flagship of the Climber range. With eight models in the range in both 2 and 4 wheel drive.

GATOR

Ready For Anything

Experience the ultimate freedom in a Gator XUV! Off road or on, these working vehicles are a dream to drive – and fully equipped for safe, surefooted productivity.

Contact one of our sales departments for more information and prices or email offers@cornthwaitegroup.com

Fully Independent Suspension

The suspension adjusts to suit your payload, and the front/rear travel sets new standards in comfort. A sway bar on the rear axle reduces body roll in extreme conditions.

Car-style Comfort

With impressive soundproofing, car-style controls and a fold up windscreen, the Gators make work a pleasure. Choose either nets or full doors. The fully enclosed cab has a heater as standard, perfect for work all year round.

Modern Cab

The cab on XUV835M and XUV865M models raises the bar in terms of comfort, space and storage.

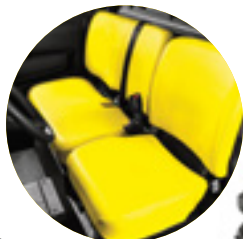

Power Steering

Power steering is standard on the XUV590M, XUV590M S4, XUV855M, XUV855M S4, XUV835M and XUV865M.

Road Ready

All our XUVs are fully homologated and ready for use on public roads.

Gators have a range of towing and carrying capacities to suit your needs, please contact your local depot for specifications

COMPACT TRACTORS 3 SERIES

With innovative features, these series offer a smaller alternative. Easy to manoeuvre, they enable you to tackle a wide array of jobs with ease.

Experience a High Standard

Building, mowing, digging, tilling – sunrise to sunset – it's all in a day's work. That's why we made the 3 Series Compact Utility Tractors premium in every aspect ... and literally from ground up.

The All-rounder

Our 3E Series tractors combine simplicity and ease of operation with 'big tractor' features like twin touch pedals and power assisted steering.

Experience Power Management

To help you use the power of your 3R Series tractor to the full, we fit a whole suite of advanced features as standard. These include 4WD, a digital performance tracking system, and LoadMatch.

Nimble Performer

Even with a loader attached, the 3038E is a joy to manoeuvre in tight spots and confined spaces.

Easy Lift Bonnet

The 3038E model now has an easy lift bonnet with standard, twin gas-charged lift struts. Just flip the latch for wide-open access to the engine bay.

Easy On/Off Access

Getting on and off is safe and easy thanks to the left-side step and the clear, unobstructed step-through platform with its non-slip surface.

COMPACT TRACTOR 4 SERIES

Packed With Goodies

Introducing the 4M and 4R Series – loaded with premium, state-of-the-art technology and class-leading features you won't find anywhere else. Take one look and it's easy to see why the 4 family truly is the new king of the compacts.

Planetary Gears

This is the same final drive layout we fit in our bigger tractors. It improves reliability by spreading the load over three gears.

Greater Control, Fewer Emissions

Intelligent common rail engines control fuel injection timing and provide precise control for increased performance. The 4066R also features a diesel particulate filter for reduced engine emissions.

Standard Joystick with 3rd function

Ergonomically located integrated joystick for maximum control and comfort during operation of front or mid-mounted implements. It also features an integrated 3rd function which is ideal when using a multi-function bucket etc. The 4th and 5th function have independent controls providing additional versatility.

Single Wheel Brakes

Help to increase traction even in very rough conditions and allow even tighter turns.

Powerful Hydraulics

Large hydraulic pumps ensure responsive steering, fast loading cycles and effortless work. You can even apply optional down pressure on the 3-point hitch when drilling post holes.

EXPERT CHECK

Always Be Prepared

Preparation is everything! Put your machine through our extensive point by point technical check by our certified technicians, who will complete a comprehensive overview of your machine's status and needs. We will then provide you with the findings of the inspection and offer a fixed price to complete the work.

Now Tailor Made

There is an Expert Check that fits all your needs depending on age, usage and application. The Expert Check looks over the key functions and safety features specific to your machine. From older machines that need to stay in good shape, to those that are brand new, they all have to perform at their peak whatever the weather.

BOOK YOUR EXPERT CHECK

We can carry out your check alongside your service or separately.

Contact your local Aftersales department or email: offers@cornthwaitegroup.com

END OF WARRANTY INSPECTIONS

It's important to get your machine checked over when approaching its 'End of Warranty' term so that any safety or key functions that have failed can be fixed/rectified within this period. **DON'T MISS OUT!**

STIHL

APPROVED
DEALER

STIHL®

From
£2,415

The compact and manoeuvrable STIHL RT 4082 ride-on mower is perfect for large lawns up to 4000 m². Thanks to its small turning circle and unobstructed forward view, you can work efficiently in gardens with trees, shrubs and other obstacles. With the single pedal drive, the direction of travel can be conveniently switched between forward and reverse gear using a hand lever to quickly manoeuvre the mower. The mowing deck blades can also be engaged and disengaged very easily by simply pushing a switch on the control panel. You can also optionally retrofit this ride-on mower with a mulch insert.

The RT 4082 comes with a 5 year extended warranty (subject to registration and annual servicing).

Key Features:

- Turf Tyres
- Low Step
- Trailer Hitch
- Central Cutting Height Adjustment
- Electromagnetic blade clutch (EBC)
- 80cm Cutting Width
- Cutting Height 35-90 mm
- Grass Catcher Capacity 250L

The RM 253 T Self Propelled Petrol Lawnmower features the largest cutting width (51cm/20") of the 2 series range, perfect for lawns up to 1800m². The single-speed drive allows you to mow the lawn without having to push the mower, great for steeper lawns. The central cutting height adjustment features seven settings, from 25 to 75 mm ensuring your lawn is cut to the height you require. The powerful ReadyStart engine is nice and easy to start and offers plenty of power to efficiently mow your lawn.

RM253
FROM
£239

The RM 248 petrol mower is ideal for small to medium-sized lawns up to approx 1200m². The single-speed drive allows you to mow the lawn without having to push the mower, great for steep and larger lawns. Featuring foldable handlebars with a super-soft grip, the RM 248 T offers a compact storage solution and extra comfort when pushing across the lawn. Simple operation of the central seven-setting cutting height adjustment enables an extremely precisely cut lawn at heights from 25 to 75 mm.

GET A
SECOND
BATTERY
HALF PRICE

LITHIUM-ION COMPACT
cordless power battery for
medium sized and larger
gardens

LITHIUM-ION PRO cordless
power battery for large
gardens and professional
applications

Get a second battery half price when you buy a promotional STIHL cordless AK or AP set with a tool, recommended batteries and charger. The price paid will include the second battery at half price. STIHL and its Approved Dealers reserve the right to change the sets in this promotion for alternative sets. While stocks last.

All the tools in the STIHL COMPACT and PRO cordless system are designed to be easy to use, light-weight and also quiet. But they don't compromise on performance. They are powered by a high-performance Lithium-Ion battery that can be used in all the tools in their system, so the second battery gives you option to extend the run time in your tool and use it in other tools too. That's real cordless power. Made by STIHL.

Making wood cutting easier, quicker and simply more satisfying, a quality chainsaw will cut through the work in next to no time.

Does size matter?

- Consider what you need the saw for : a 30cm guide bar can cut almost twice its length – that's a half metre diameter log.
- You obviously need power, but not too much to control. Consider the task and seek advice. Make it safe : make it easy.
- Check for safety features like an inertia chain brake, side chain tensioning and a chain catcher.
- A saw that is comfortable to use is safer to use. Find a well-balanced machine with a good power-to-weight ratio: light enough to handle with the power to do the job.
- Ease of use is another deciding factor. Is the chainsaw easy to start? Are controls accessible and simple to operate?

Always seek specialist advice when choosing a chainsaw. As your local Stihl Approved Dealer we can guide you on the most appropriate saw for your needs and supply relevant safety clothing and accessories.

**MS170
FROM
£157.50**

The **MS 170** is a small chainsaw that packs a punch. It is perfect for cutting firewood and for general garden chainsaw tasks. Well suited to domestic users, the MS 170 chainsaw has been fitted with the STIHL anti-vibration system for comfortable use. The economical, compact and lightweight MS 170 is a small chainsaw, making it the perfect entry-level chainsaw.

**MS181
FROM
£258.33**

Packed with new technology—at a value price—the **MS 181** chainsaw is designed to reduce vibrations, making it more comfortable to operate. This chainsaw also features reduced-emission engine technology, which lowers fuel consumption as well as emissions; maintaining good cutting speed. Perfect for cutting firewood, for building work and for felling small trees.

**MS251
FROM
£487.50**

The new **MS 251** is ideal for a variety of applications, from cutting firewood to timber construction. This high torque engine is easy to start and comfortable to use, with a high cutting performance. Emissions are cut by 70% and fuel consumption is up to 20% lower compared to a STIHL 2-stroke engine of the same power output without 2-MIX technology.

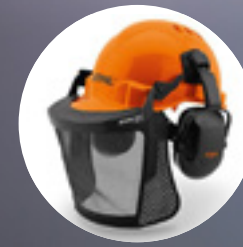

**MS181
C-BE FROM
£283.33**

Similar to the MS 181, the **MS 181 C-BE** has additional "Comfort" features, including the ErgoStart (E) system and Chain Quick Tensioning (B) and fuel primer, making this chainsaw virtually effortless to start and easy to maintain. Perfect for cutting firewood or felling trees up to 12 inches in diameter, it is a lightweight practical chainsaw with convenient features you can rely on.

WESSEX

CAR Rotary Mower

The Wessex AR SERIES ROTARY MOWERS are the first choice for regularly mown areas, as the work rates are higher and the maintenance costs are lower than a flail mower. The AR Series includes 1.2m, 1.5m and 1.8m models with various engine options, and are well suited to general pasture topping or fine turf work and are popular on farms, studs and private estates.

CE-1.25 Hydraulic Tipping Trailer 1.25ton

The Wessex 1.25 ton hydraulic tipping trailer is ideally suited to the compact tractor for use on private estates, large gardens and smallholdings. Featuring all-steel construction with removable sides and tailgate.

For use with green waste and other large or bulky materials, mesh side extensions are available as an optional extra.

LS-100 Tractor Mounted Logsplitter

The WESSEX LS100 LOGSPLITTER turns a chore into an enjoyable task! With up to 10 ton of splitting force* at its disposal, the LS100 will effortlessly crack logs up to 18"/450mm in height.

A floor-level platform means loading logs onto the splitter is safe and easy, whilst two-handed operation keeps the operator protected,
