Description

New Husqvarna Automower 310E NERA For Sale

Specification Includes:

- Wire-free robotic lawn mower for lawns up to 1,500 m².
- It minimises the need to trim the edges of your lawn, saving time and effort with the EdgeCut feature.
- The wire-free installation requires Wi-Fi coverage across the full lawn, and with virtual boundaries enabled by our included satellite-based technology, installation becomes flexible and robust.

Requirements:

- Wi-Fi internet coverage across the full lawn area is needed. It is easy to check your Wi-Fi coverage, and there are a variety of options to solve this if your coverage is not sufficient.
- The Automower® Connect app. Available for free on the AppStore and Google Play.
- The selectable mowing patterns feature enables you to choose from a striped, checkerboard or triangle pattern on your lawn, and gives an area capacity of 1,500 m². Or, for a carpet-like finish, choose the irregular pattern mode, which offers a 1,000 m² area capacity.
