In Stock

Description

New Husqvarna Automower 435X AWD NERA For Sale

Specification Includes:

- Wire free technology robotic lawn mower featuring excellent slope performance and the ability to tackle rough terrain and lawns up to 5000m².
- Steep slopes of up to 70% are handled by the all-wheel drive and the articulated body enables excellent manoeuvrability and traction in demanding terrain and narrow passages.
- A wire free installation offers complete flexibility with precise virtual boundaries, enabled by satellite-based technology with the included Husqvarna EPOS™ Technology. This also means there is no risk of wire breakage.
- Tailor the lawn to your needs thanks to the integrated Zone Control feature, which allows you to create several work areas with different settings via the Automower® Connect app. Just as easily, temporary stay-out zones can be created to preserve seasonal wildflowers or garden project areas.
- Choose between a smooth-looking or patterned finish on your lawn with systematic mowing.
- Precise mowing is achieved with a reduced risk of impact and unplanned stops due to the sensors on the mower which detect and avoid obstacles.
